

Focus on syncing from the phone

We need to check the phone
once a day for new calendar
invites

And send to server

Only upload 1 image
Or video

Notes should only be enough to
cover 25% of the screen
If we need to limit it

Delete pass calendar events

Scan QR code also save link

Can only upload 1 image at a time

On weather, add icon for sunny,
cloudy
And location

Default the link component to be
brand logo
